19 Rayden invested \$20 000 at a rate of 0.3% per month compound interest.

(a) Find the value of his investment at the end of 2 years.

Answer \$ [2]

(b) Rayden then withdrew $\frac{1}{5}$ of the accumulated amount at the end of the 2 years. Find the new rate of compound interest per month so that his remaining investment reaches the same value in (a) in another 3 years.

Answer % [2]

20 Simplify $\frac{2x^2 - 5xy - 12y^2}{x^2 - 16y^2}$.

Answer [3]

21 P is the point $(-3, 1)$ and Q is the point $(3, 3)$.

(a) Find the length of the PQ .

Answer units [2]

(b) The point R is such that PQR forms an isosceles triangle.
The angle bisector of angle PQR has an equation of $y = x$.
Find the coordinates of R .

Answer (.....,) [1]

1 A company produces phones.
In 2023, the company produced 3.6 million smartphones.

(a) Due to increased demand, the company produced 4.2 million smartphones in 2024.
Express this production figure in standard form.

Answer [1]

(b) Calculate the percentage increase in smartphone production from 2023 to 2024.

Answer % [2]

(c) In 2023, 4% of the total phones produced were not smartphones.
Calculate the total number of phones produced in 2023.

 The centre of the base of the cone and the hemisphere coincides.
 The cone has a radius of 2 m and height of 3 m.
 The hemisphere has a radius of 3 m.

- (a) Find the capacity of the container.

Answer m³ [2]

- (b) There is a tap on the vertex of the cone.
The container is filled with water such that the hemisphere and 90% of the cone are filled.
Find the area which the water is in contact with the container.

- 1 Tay is part of a student committee organizing a charity race event in 2025.
 0 He wants to estimate the cost per participant to cover all expenses.

He did some more research and found the following costs.

Costs (excluding 9% GST)		
Item	Description	Unit cost
Printing of T-shirts	One sided print Bundle of 100 pcs	\$800
	Double sided print Bundle of 100 pcs	\$1500
	Bundle of 500 pcs	\$7000
Goodie bags (Pack of 5)	One pack of 5 bags	\$20
	Bulk price (100+ packs)	\$18
	Bulk price (500+ packs)	\$15
Booking of venue	At least 6 months in advance	\$1200
	3 to 5 months in advance	\$1500
Refreshments	Large set	\$3
	Regular set	\$2.80
	Small set	\$2.50
Participant medals	Pack of 10	\$45
	Pack of 50	\$210

The T-shirts are printed overseas and shipped by a local courier.

Tay estimated the weight of each shirt to be 140 grams and he needs to select one of the local couriers.

The shipping rate depends on the weight of the product and courier.

Local Courier	First kg	Next 0.5 kg	Weight Limit of each parcel*
Simply Post	\$4.80	\$1.85	80 kg
Singapore Post	\$6.00	\$1.80	50 kg
DPEX	\$5.50	\$1.60	30 kg

*Products need to be shipped in separate parcels if weight exceeds the limit.

9% GST is applicable for import goods as well as shipping fees.

- (a) How many percent more will Tay need to pay if he booked the venue 3 months in advance instead of 6 months in advance?

Answer % [1]

- (b) For a 50 kg purchase, calculate the amount of shipping fees charged by Singapore Post.

Answer \$ [2]

The event is scheduled to be in October.

Tay estimated the number of participants to be 1000 and he plans to confirm the venue by February.

He also wants to print double sided for the participant's T-shirt, and issue a goodie bag, refreshment and medal to each participant.

He needs to decide how much registration fee he should charge each participant. He must be able donate at least 40% of the proceeds to the charity and still cover all the costs.

- (c) Suggest a sensible amount for the registration fee of a participant. State your assumptions and decisions if any. Show your calculations clearly.
