Section B [30 marks]

You are advised to write between 250 and 350 words for this section.

You should look at the printout of a Facebook Group Page on page 3, study it carefully and plan your answer before beginning to write.

Recently, several issues about Greendale Estate were posted on its Facebook Group Page. There were three issues which were highlighted on the front page. As a concerned resident, you have decided to write an article on one of these issues in the next Town Council Newsletter to express and encourage fellow residents to contribute to a safe neighbourhood.

In your article, you should include the following content:

- A title to attract the attention of your fellow residents
- State the issue that you are most concerned about
- Explain how this issue affects the residents and the estate
- Suggest what can be done to resolve this issue

Write your article for Greendale Estate's Town Council Newsletter in clear, accurate English. Your tone should be persuasive and encouraging to convince fellow residents of the importance of resolving this issue.

You may add any other details you think will be helpful.

Neighbours feeding stray cats

My neighbours love to feed the stray cats in the neighbourhood. Though I understand that they are animal lovers, this practice of theirs attracts cockroaches and rats as they do not clear away the leftover food after feeding the stray cats. This practice is a cause for concern because it affects the hygiene and cleanliness of the community.

Obstruction along Common Corridors

I am very concerned about the crowded corridor leading to my flat. The walkway is so narrow that it makes it very difficult for us to walk through. Even though I have approached my neighbours about this issue, they did not remove their belongings. Some of these items are clearly highly flammable. Please help.

Reckless Cyclists on Pedestrian Walkways

This is so reckless. This young man almost knocked over my 5 year-old boy yesterday because he was speeding on the pavement. I lost count of the number of times I was almost knocked over by these reckless people on bicycles. Can the Town Council please do something about this before an accident happens?

Text 2

The text below describes how the writer and his family, who lived in a rural village coped with a flash flood. Read the text carefully and answer Questions 5-14 in the Question Booklet.

- In the long hot summer of 1921 a serious drought hit the country. Springs dried up, the wells filled with frogs, and the usually sweet water from our scullery pump turned brown and tasted of nails. Although this drought was a relief to my family, it was a curse to the rest of the village. For weeks the sky hung hot and blue, trees shrivelled, crops burned in the fields, and the old folk said the sun had slipped in its course and that we would all very soon die. There were prayers for rain; but my family didn't go, because it was rain we feared most of all.
- As the drought continued, prayers were abandoned by the villagers and more devilish steps adopted. Soldiers with rifles marched to the tops of the hills and began shooting at passing clouds. When I heard their dry volleys, breaking like sticks in the stillness, I knew our long armistice was over. And sure enough whether from prayers or the shooting, or by a simple return of nature the drought broke soon after and it began to rain as it had never rained before.
- I remember waking in the night to the screams of our Mother, and to rousing alarms of a howling darkness and the storm-battered trees outside. Terror, the old terror, had come again, and as always in the middle of the night.

 'Get up!' cried Mother.' It's coming in! Get up or we'll all be drowned!'

 I heard her banging about and beating the walls in accents of final doom. When Mother gave her alarms one didn't lie back and think, one didn't use reason at all; one would leap out of bed and scramble downstairs with the others.
- We darted about for brooms, then ran out to tackle the storm. We found the drain blocked already and the yard full of water. The noise of the rain drowned our cries and whimpers, and there was nothing to do but sweep. What panic those middle-night rousings were, those trumpet-calls murdering sleep; with darkness, whirlwind, and invisible rain, trees roaring, clouds bursting, thunder crashing, lightning crackling, floods rising, and our Mother wailing irrationally. The girls in their nightdresses held spitting candles while we boys swept away at the drain. Hot rods of rain struck straight through our shirts; we shivered with panic and cold.
- The flood-water gurgled and moved thickly around us, breeding fat yellow bubbles like scum, skipping and frothing where the bullet rain hit it, and inching slowly towards the door. The drain was now hidden beneath the water and we swept at it for our lives, the wet candles hissed and went out one by one. Mother lit torches of newspapers, while we fought knee-deep in cries and thunder, splashing about, wet-through, half-weeping, overwhelmed by gigantic fears.

Turn over

- 6 There would be a horrible mess in the kitchen next morning, mud and slime all over, followed by the long depressed drudgery of scraping it up and carrying it away in buckets. Mother, on her knees, would wring her hands and roll her eyes. 'I can't THINK what I've done to be so troubled and tried. Neither saints nor angels would keep their patience if they had such things to put up with.... My poor, poor children, my precious darlings - you could die in this filthy hole. No one would care - not a soul. Look out with that bucket!...'
 - 40

- 7 Apart from the noise, the tears and the dirt, these inundations were really not much. But I can't pretend they didn't scare me. The thought that the flood-waters could actually break into our house seemed to me something worse than a fire. At the mid-hour of night, when the storms really blew, I used to lie aghast in my bed, hearing the rain claw the window and the wind slap the walls, and imagining the family, the house, and all the furniture, being sucked down the drain.
- 8 It was not till much later that I reasoned that our position on the hillside made it unlikely we would drown, that Mother's frenzies and scares belonged to something else altogether, and that it was possible after all to sleep through rain in peace. Even so, to this day, when the skies suddenly darken, and a storm builds up in the west, and I smell rain on the wind and hear the first growl of thunder, I grow uneasy, and start looking for brooms.

Section C

Text 3

The text below is about tourism. Read it carefully and answer Questions 15-20 in the Question Booklet

- The word 'tourism' did not exist when Thomas Cook was born but at his death. his name was synonymous with the tourism industry he had started. An impoverished preacher and a strict non-drinker, Thomas Cook made his start when he chartered one of the newly invented trains to take a party of fellow non-drinkers a grand total of 11 miles to their regular meeting, with the profits split between Cook and the 5 other meeting organisers. This success emboldened Cook, and he began to offer cheap day trips to the working classes, as well as grander expeditions to the emerging middle classes, exploiting the possibilities opened up by the rapidly expanding train networks. Soon, he was selling escorted tours to Europe, America and Biblical sites in the Holy Land.
- Before Thomas Cook, recreational travel was limited to the wealthy. The 2 eighteenth-century sons of European elites, fresh from university and unconstrained by either time or money, would embark on what they call the Grand Tour, visiting revered sites of classical culture. They would network with fellow members of the upper class, the rich and wealthy of various nations before they return to assume positions of power in their own countries. Interaction with the locals was kept to the minimal and cultural artefacts were shipped back home to demonstrate their status and impress future guests.
- Over time, the working class won the right to paid holidays and then gained increases in disposable incomes. These, along with the introduction of travel by 20 car, bus and later by plane transformed recreational travel from what was exclusive to the affluent few available to the masses. Modern mass travel has enabled today's holidaymakers to escape from the rigours and routines of work, or seek thrills in the unfamiliar. Where they want to escape to can be very diverse, of course. Many may choose to explore their own countries more widely while others 25 look further for a better climate or in search of the new: a different landscape, culture or culinary experience.
- Whatever the reason for travel, all destinations gain financially from tourism, particularly the poorest. Tourism can benefit local communities by providing employment, even if it is only seasonal. Tourism also revitalizes communities through economic investments which reverse declining traditional industries. Cultural assets, heritage and crafts can be preserved when the community appreciates their economic benefits. These economic benefits may also motivate locals to work to preserve the natural environment along with protecting endangered wildlife. Furthermore, when the profile of a destination is raised, 35 community pride can also be rekindled.

- But there exists a less rosy analysis of the travel boom. Problems arise from overreliance on tourism as it is vulnerable to political upheaval, economic uncertainty
 or natural disaster. Furthermore, tourists often visit only famous or iconic sites,
 thereby concentrating the economic benefits of their visits in the hands of only a
 few businesses. Tourists are also criticized for barely scratching the surface of
 what a destination has to offer before hastily moving on. Instead of broadening
 their minds, these tourists cling to preconceived notions of their destinations, and
 are ignorant or what is worse indifferent to local customs and sensitivities. Such
 tourists often offend the local inhabitants, creating misunderstandings and cultural
 strife. For their own comfort and convenience, they want to speak their own
 language, be friendly only with their fellow tourists, and eat only what they find
 familiar. By keeping the natives at arm's length, they highlighted the differences
 between them and the locals, the 'haves' and the 'have-nots'.
- There is a paradox at the heart of modern tourism: the very thing that draws the crowds is changed, even endangered by these very same crowds. Their growing numbers are spawning a global culture of homogeneous fast-food outlets and brand name goods, which drives out what is local, traditional and distinctive. Where the traditional culture survives, it is often a source of shallow entertainment, a prettified and lifeless version of what was once crucial and alive. In addition, the sheer weight of numbers of visitors can mean that erosion a natural process is accelerated. The World Heritage site of Angkor in Cambodia, for example, was securely cloaked by forest and unvisited for centuries. Since its rediscovery, annual visitor numbers have surpassed two million, crushing its sandstone steps underfoot even while bringing vital income for Cambodia's economy. Being a 'must-see' 60 destination is now a double-edged sword, requiring popular tourist sites to regulate visitor numbers so as to minimize negative impacts.

20 Using your own words as far as possible, summarise the positive and negative effects that tourism has on the destinations visited.

Use only information from paragraphs 4 to 5.

Your summary must be in continuous writing (not note form). It must not be longer than 80 words, not counting the words given to help you begin.

For better or worse, tourism has impacted various destinations as...

Positive Effects

From the passage	Paraphrase
(line 28) <u>all destinations</u> gain financially from tourism	benefits every tourist attraction monetarily/ economically/ financially
(line 29-30) Tourism can <u>benefit</u> local <u>communities</u> by <u>providing employment</u> , even if it is only seasonal	through <u>creating</u> <u>different forms</u> of <u>work</u>
(lines 30-31) Tourism also <u>revitalizes</u> communities through <u>economic</u> <u>investments</u> which <u>reverse declining</u> traditional <u>industries</u>	and stimulating/ revitalising local businesses or and revive local businesses which are dying
(lines 32-33) <u>Cultural assets, heritage and crafts</u> can be <u>preserved</u> when the community appreciates their economic benefits	thus conserving traditional arts and cultures.
(lines 33-34) These economic benefits may also motivate locals to work to preserve the natural environment along with protecting endangered wildlife.	Natives are encouraged to protect threatened flora and fauna
(lines 35-36) Furthermore, when the profile of a destination is raised, community pride can also be rekindled.	while fame instils self-identity/ community pride of the destination's inhabitants.

Negative Effects

From the passage	Paraphrase
(lines 37-39) Problems arise from <u>over-reliance</u> on tourism as it is <u>vulnerable</u> to <u>political upheaval</u> , <u>economic uncertainty or natural disaster</u> .	However, over-reliance on tourism is <u>undesirable</u> because it is <u>susceptible</u> to political (instability), economic (situations) and natural disasters/calamities.
(lines 39-41) tourists often <u>visit only</u> famous or iconic sites, thereby concentrating the economic benefits of their visits in the hands of only a few businesses.	Often, tourists focus on only must-see destinations, greatly limiting economic benefits
(lines 42-45) Instead of broadening their minds, these tourists cling to preconceived notions of their destinations, and are ignorant – or what is worse – indifferent to local customs and sensitivities.	Some stubbornly believe stereotypes/ thus are oblivious to local culture
(line 45) Such tourists often offend the local inhabitants,	and thus may upset/ annoy/ insult the natives
(lines 45-46) creating misunderstandings and cultural strife.	causing cultural conflicts/ misunderstandings.
(lines 48-50) By keeping the natives at arm's length, they <u>highlighted</u> the <u>differences</u> between them and the locals, the <u>haves and the have-nots</u> .	By limiting interactions with the locals, they emphasize the gulf/ gap in their socio-economic status.
