Preliminary Examination (2008)
Primary 6

MATHEMATICS
(BOOKLET A)

Name: _____ ()

Class: P 6. _____

Booklet A (20)	
----------------	--

Total time for Booklets A and B: 2h 15 min

Do not turn over this page until you are told to do so.

Follow all instructions carefully.

Answer all questions.

Shade your answers in the Optical Answer Sheet (OAS) provided

This booklet consists of 5 printed pages.

Questions 1 to 10 carry 1 mark each. Questions 11 to 15 carry 2 marks each. For each question, four options are given. One of them is the correct answer. Make your choice (1, 2, 3 or 4). Shade the oval (1, 2, 3 or 4) on the Optical Answer Sheet.

20 marks

1. Find the value of $\frac{2}{5} \times \frac{1}{3} \div 3$
 - (1) $\frac{1}{3}$
 - (2) $\frac{2}{3}$
 - (3) $\frac{2}{5}$
 - (4) $\frac{2}{45}$

2. Mary spent $\frac{1}{6}$ of her money on a story book and $\frac{3}{10}$ of the remainder on a blouse. If she had \$21 left, how much did the story book cost?
 - (1) \$3
 - (2) \$6
 - (3) \$9
 - (4) \$12

3. Tim has \$m. Alan has \$9 less than Tim. What is the average amount of money each boy has?
 - (1) \$ $\frac{m-9}{2}$
 - (2) \$ $\frac{9-m}{2}$
 - (3) \$ $\frac{2m-9}{2}$
 - (4) \$ (m - 9)

4. James ran 10 km, cycled 54 km and swam 1 500 m last week. What was the total distance covered?
 - (1) 1 564 m
 - (2) 2 140 m
 - (3) 7 900 m
 - (4) 65 500 m

(Go on to the next page)

5. Rasidah used 15 cm of ribbon to make a bow. She made 30 bows altogether. How much ribbon did she use?

- (1) 4.5 cm
- (2) 45 cm
- (3) 4.5 m
- (4) 45 m

6. What is the volume of the solid below?

- (1) 16 cm^3
- (2) 32 cm^3
- (3) 48 cm^3
- (4) 52 cm^3

7. In the figure, AFD is a straight line and $\angle CFE$ is a right angle. Find $\angle y$.

- (1) 50°
- (2) 64°
- (3) 74°
- (4) 90°

(Go on to the next page)

8. Which square must be shaded so that the figure has a line of symmetry?

- (1) A
 (2) B
 (3) C
 (4) D

9. The figure is formed by 3 straight lines. What is the value of $\angle a$?

- (1) 60°
 (2) 75°
 (3) 135°
 (4) 225°

(Go on to the next page)

10. The pie chart represents the number of people in a hall. Half of them are girls and women. How many more boys than men are there in the hall?

- (1) 14
 (2) 19
 (3) 24
 (4) 48
11. Buns were sold at 3 for \$2. Mrs Lee wants to buy 40 buns for her pupils. How much did she spend?
- (1) \$13
 (2) \$20
 (3) \$26
 (4) \$28
12. A rectangular piece of paper (Diagram A) is folded along a diagonal as shown below. The area of the resulting figure, as shown in Diagram B, is $\frac{5}{8}$ of the area of the original piece of paper. If the shaded area is 24 cm^2 , find the area of the original rectangular piece of paper.

- (1) 9 cm^2
 (2) 15 cm^2
 (3) 48 cm^2
 (4) 64 cm^2

(Go on to the next page)

13. The pie chart shows how Mrs Chen spent her money on her holiday. The amount spent on food was the same as the amount spent on transport. If the amount Mrs Chen spent on sightseeing is $\frac{1}{3}$ the amount she spent on food, how much did she spend on accommodation?

- (1) \$ 400
 (2) \$1600
 (3) \$2000
 (4) \$2400
14. Jane's average savings for the first 5 months of the year was \$76. If she had saved \$90 in May, her average savings would have been \$80. How much did she actually save in May?
- (1) \$20
 (2) \$70
 (3) \$86
 (4) \$94
15. Marie gave 20% of her salary to her mother. Her mother spent 45% of the sum she was given. What percentage of Marie's salary had her mother left?
- (1) 9%
 (2) 11%
 (3) 44%
 (4) 55%

Primary 6

Mathematics
(BOOKLET B1)

Name: _____ ()

Class: P 6. _____

Booklet B1 (30)	
-----------------	--

Do not turn over this page until you are told to do so.

Follow all instructions carefully.

Answer all questions.

This booklet consists of 6 printed pages.

Section B1

Questions 16 to 25 carry 1 mark each. Write your answers in the spaces provided.
For questions which require units, give your answers in the units stated.

30 marks

16. The sum of three whole numbers is 10.
The product of the same three numbers is 30.
What are the numbers?

Ans: _____

17. $0.153 = 0.103 +$ _____
What is the missing number?

Ans: _____

18. Find the sum of the common factors of 18 and 24.

Ans: _____

19. There is 600 m^3 of water in a rectangular swimming pool.
The height of the water level is 2 m.
If the length of the pool is 20m, what is its breadth?

Ans: _____ m

(Go on to the next page)

20. Mr Lim went to the bank to exchange 100 5-cent coins, 200 20-cent coins and 150 50-cent coins for \$10 notes. How many notes did he get?

Ans: _____

21. How many more rectangles must be shaded, so that the area of the shaded portion is $\frac{2}{3}$ of the whole figure?

Ans: _____

22. The figure below shows a line XY and a point Z. Draw a line parallel to XY passing through point Z.

23. Express $\frac{3}{8}$ as a percentage.

Ans: _____%

(Go on to the next page)

24. The figure below shows the net of a cube.

The cube is placed on the table with the number 2 on the top face. Which number is on the bottom face of the cube?

Ans: _____

25. There are 20% more boys than girls in a choir. If there are 8 more boys than girls, how many children are there altogether?

Ans: _____

Questions 26 to 35 carry 2 marks each. Show your working clearly in the space below each question and write your answers in the space provided. For questions which require units, give your answers in the units stated.

26. Find the value of $100.4 - 6.1 \times 5 + 10 \div 2$.

Ans: _____

(Go on to the next page)

27. Mark numbered all his books and packed them into 5 boxes of different colours. He put the first book in the red box, the second book in the green box, the third book in the yellow box, the fourth book in the blue box and the fifth book in the purple box. He repeats the process until all the books have been placed in boxes. In which box will the 89th book be in?

Ans: _____

28. I am a 4-digit number. Read the clues below to find out what number I am.

- (1) There is a 2 in the thousands place.
- (2) The digit in the tens place is 4 times the digit in the thousands place.
- (3) The digit in the ones place is half of the number in the tens place.
- (4) The digit in the hundreds place is 5 less than the number in the tens place.

Ans: _____

29. The breadth of a rectangle is three-quarters its length. If the area of the rectangle is 48 cm^2 , what is the smallest perimeter that the rectangle can have, assuming that its length and breadth is a whole number?

Ans: _____ cm

(Go on to the next page)

30. The figure below, not drawn to scale, shows a square drawn in a circle of diameter 40 cm. What is the area of the *unshaded* region?
(Take $\pi \approx 3.14$)

Ans: _____ cm²

31. What is the area of the shaded region?

Ans: _____ cm²

32. The area of a square classroom is 36 m².
How many 50-cm square tiles are needed to tile the floor of the classroom?

Ans: _____

(Go on to the next page)

METHODIST GIRLS' SCHOOL (Primary)
Preliminary Examination (2008)
Primary 6

MATHEMATICS
(BOOKLET B2)

Name: _____ ()

Class: P 6. _____

Booklet A (20)	
Booklet B1 (30)	
Booklet B2 (50)	
Total: (100)	

Do not turn over this page until you are told to do so.

Follow all instructions carefully.

Answer all questions.

This booklet consists of 10 printed pages.

33. The figure below is not drawn to scale.
 ABC is a triangle and $CA = CD$.
 EAF is a straight line and it is parallel to CB. Find $\angle x$.

Ans: _____

34. The table shows the rate of charges for parking at a car park.

1 st hour	\$1.50
Subsequent per half hour or part thereof	\$1.00
After 5 p.m.	\$2 per entry

Mr Kim parked his car from 1.15 p.m. to 7 p.m. How much did he pay?

Ans: \$ _____

35. Raju earns a fixed monthly salary. Last month he saved 20% of it.
 This month he saves 20% less than what he saved last month.
 The difference in savings between the two months is \$200. What is his monthly salary?

Ans: \$ _____

For questions 36 to 48, show your working clearly in the space provided for each question and write your answers in the space provided.
The number of marks available is shown in brackets [] at the end of each question or part-question.

50 marks

36. The figure is made up of two squares.

- (a) Express the perimeter of the figure in terms of g cm in the simplest form.
- (b) If $g = 3$, find the area of the figure.

Ans: (a) _____ [1]

(b) _____ [2]

(Go on to the next page)

37. Use the information in the table below to answer the questions.

The table below shows the results of a survey on 200 married couples.

How often do you go the movies?

Name of group	Size of group	Answer given
A	A small number	"Very often"
B	13%	"Often"
C	25%	"Sometimes"
D	More than half	"Hardly ever"

A pie chart is drawn to represent the results of the survey.

- (a) Write the letter B in the correct part of the pie chart shown. [1]

- (b) How many adults gave the answer as "Sometimes"?

Ans: (b) _____ [2]

(Go on to the next page)

38. In the figure, ABCD is a parallelogram. O is the centre of the circle.
Find

- (a) $\angle ABD$
(b) $\angle ADC$

Ans: (a) _____ [2]

(b) _____ [1]

39. Mrs Hanson typed a 20-page report. For the first 8 pages, she typed at a rate of 50 words per minute. For the remaining pages, she slowed down to a rate of 30 words per minute. On average, the first 8 pages had 500 words each and the rest of the pages had 200 words each. How long did Mrs Hanson take to type the entire report? Give your answer in hours and minutes.

Ans: _____ [3]

(Go on to the next page)

40. 390 marbles were placed into 3 boxes according to their colours. The number of blue marbles is twice the number of the red marbles, and the number of green marbles is less than the number of blue marbles. The number of marbles in each box is less than 200. The number of marbles in each box is divisible by both 6 and 5. How many green marbles were there?

Ans: _____ [3]

41. The figure below is made up of a semi-circle of diameter 28 cm and a triangle ABC. O is the centre of the semi-circle. Find the area of the shaded part.
(Take $\pi = \frac{22}{7}$)

Ans: _____ [3]

(Go on to the next page)

42. At a practice, a netball player threw the ball at the net 100 times. For the first 70 throws, the ball went into the net 2 times out of every 5 throws. For the remaining throws, she managed to score 80% of the throws. How many times did the ball miss the net?

Ans: _____ [4]

43. In the figure (not drawn to scale), ABCD is a rhombus, $\angle ADB = 69^\circ$ and $\angle BEC = 127^\circ$.

- (a) Find $\angle a$.
 (b) Find $\angle b$.

Ans: (a) _____ [2]

(b) _____ [2]

(Go on to the next page)

44. $\frac{1}{5}$ of Mark's coins is $\frac{1}{4}$ of Siti's coins. All of Mark's coins are 50-cent coins, while Siti has a combination of 50-cent and 20-cent coins. Mark has 16 more coins than Siti. If Siti gives half of her 20-cent coins to Mark, Mark will have \$42.40. How much money did Siti have at first?

Ans: _____ [4]

(Go on to the next page)

45. At 7.30 a.m. a bus left Town S for Town R travelling at an average speed of 60km/h.
15 minutes later, a car left Town R for Town S. The car reached Town S at 10.45 a.m. The bus reached Town R at 12 noon.
- (a) How far apart were the two towns?
 - (b) What was the average speed of the car?
 - (c) How far apart were the two vehicles at 9.45 a.m.?

Ans: (a) _____ [1]

(b) _____ [1]

(c) _____ [3]

(Go on to the next page)

46. Xiaoling, Yoka and Zana each had some money. The ratio of the amount of money Xiaoling had to the amount of money Yoka had was 7: 3 at first. Xiaoling lent \$43 to Zana and Yoka borrowed \$185 from Zana. In the end, Xiaoling had the same amount of money as Yoka.

- (a) How much did Yoka have at first?
(b) How much did Xiaoling and Yoka each have in the end?

Ans: (a) _____ [3]

(b) _____ [2]

(Go on to the next page)

47. Tap A flows at a rate of 2 100 ml/min while Tap B flows at a rate of 2 500 ml/min. Both taps were turned on at the same time to fill a tank with dimensions 50 cm by 40 cm by 30 cm. After 5 minutes, the plug at the bottom of the tank is removed, with the two taps still running. If the water is drained at a rate of 600 ml/min, what is the water level 2 minutes after the plug is removed?

Ans: _____ [5]

(Go on to the next page)

48. Mrs Raj spent $\frac{2}{5}$ of her money on 3 blouses. She bought another 2 similar blouses and 13 handkerchiefs with the rest of her money.
- (a) What fraction of Mrs Raj's money was spent on buying the 13 handkerchiefs? Give your answer in its simplest form.
- (b) If Mrs Raj was given 1 handkerchief free for every 6 handkerchiefs bought, how many handkerchiefs would she have got altogether if she had spent all her money on handkerchiefs?

Ans: (a) _____ [1]

(b) _____ [4]

END OF PAPER

ANSWER SHEET

EXAM PAPER 2008

SCHOOL : M G S PRIMARY SCHOOL
SUBJECT : PRIMARY 6 MATHEMATICS

TERM : PRELIMINARY SA 2

Q1	Q2	Q3	Q4	Q5	Q6	Q7	Q8	Q9	Q10	Q11	Q12	Q13	Q14	Q15
4	2	3	4	3	3	3	4	3	1	4	4	3	2	2

16) 2, 5, 3

17) 0.05

18) 12

19) 15m

20) 12

21) 5

22) Z

Y

23) 37.5%

24) 5

25) 88

26) 74.9

27) Blue

28) 2384

29) 28cm

30) 628cm²

31) 42cm²

32) 144

33) 34

34) \$9.50

35) \$5000

36) a) $3g - g = 2g$

$$(3g + 3g + 3g + 2g + g + g + g) \text{cm} = 149 \text{cm}$$

The perimeter of the figure in terms of g cm in the simplest form is 149cm.

b) $3 \times 3 = 9 \text{cm}$

$$9 \text{cm} \times 9 \text{cm} = 81 \text{cm}^2$$

$$3 \times 3 = 9 \text{cm}^2$$

$$81 \text{cm}^2 + 9 \text{cm}^2 = 90 \text{cm}^2$$

The area of the figure is 90cm².

37)a)

b) $100\% \rightarrow 200$
 $25\% \rightarrow \frac{25}{100} \times 200$
 $= 50$
 $50 \times 2 = 100$

100 adults gave the answer as "sometimes"

38)a) $180^\circ - 30^\circ = 150^\circ$

$\angle ABD = 180^\circ - 30^\circ - 60^\circ = 90^\circ$

$\angle ABD$ is 90°

b) $\angle ADC = 90^\circ + 30^\circ = 120^\circ$

$\angle ADC$ is 120°

39) $500 - 50 = 450$

$10 \times 8 = 80$

$200 - 30 = 170$

$20 - 8 = 12$

$12 \times 6\frac{2}{3} = 80$

$80 \times 2 = 160$

$160 \div 60 = 2R40$

She took 2 hrs 40 min.

40) $6 \times 5 = 30$

$390 \div 30 = 13$

Guess: $6 \times 30 = 180$ (blue)

$3 \times 30 = 90$ (red)

$4 \times 30 = 120$ (green)

There were 120 green marbles

41) $28 \div 2 = 14$

$\frac{1}{2} \times 22 \times 14 \times 14 = 308$

$\frac{1}{2} \times 6 \times 28 = 84$

$308 - 84 = 224$

The area is 224cm^2

42) $5 - 2 = 3$

$70 \div 5 = 14$

$14 \times 3 = 42$

$100 - 70 = 30$

$100 - 80 = 20$

$20 \times 30 = 6$

100

$42 + 6 = 48$

The ball missed the net 48 times.

43) a) $\angle a = 180^\circ - 69^\circ - 69^\circ = 42^\circ$

$\angle a$ is 42°

b) $\angle BED = 180^\circ - 127^\circ = 53^\circ$

$\angle b = 180^\circ - 69^\circ - 53^\circ = 58^\circ$

$\angle b$ is 58°

44) $16 \times 5 = 80$

$80 \times 0.5 = 40$

$42 - 40 = 2.40$

$2.40 \div 0.2 = 12$

$12 \times 2 = 24$

$24 \times 0.2 = 4.80$

$16 \times 4 = 64$

$64 \times 0.5 = 32$

$4.80 + 20 = 24.80$

She had \$24.80

45) a) 7.30am to 12 noon $\rightarrow 4\frac{1}{2}$ hrs

$60 \times 4\frac{1}{2} = 240 + 30 = 270$

The two towns were 270km apart.

b) 7.45 to 10.45 $\rightarrow 3$ hrs

$270 \div 3 = 90$

The average speed is 90km/h

c) 7.30am to 9.45am $\rightarrow 2$ hrs 15min

$60 \times 2\frac{1}{4} = 120 + 15 = 135$

7.45am to 9.45am $\rightarrow 2$ hrs

$40 \times 2 = 80$

$180 - 135 = 45$

They were 45km apart.

46)a) $7-3=4$

$43+185=228$

$228 \div 4=57$

$57 \times 3=171$

Yoka had \$171 at first.

b) $\$171 + \$185 = \$356$

Xiaoling and Yoka each have \$356 in the end.

47) 1 min $\rightarrow 2100\text{ml} + 2500\text{ml} = 4600\text{ml}$

5 min $\rightarrow 4600\text{ml} \times 5 = 23000\text{ml}$

$4600\text{ml} - 600\text{ml} = 4000\text{ml}$

$4000\text{ml} \times 2 = 8000\text{ml}$

$23000\text{ml} + 8000\text{ml} = 31000\text{ml}$

$31000\text{ml} = 15.5$

50×40

The water level is 15.5cm after the plug is removed.

48)a) $\frac{2}{5} = \frac{6}{15}$

$\frac{6}{15} - \frac{3}{15} = \frac{3}{15}$

$\frac{3}{15} = \frac{1}{5}$

1 blouse \rightarrow 2 units.

$\frac{5}{15} = \frac{1}{3}$

$\frac{1}{3}$

$\frac{1}{3}$ of Mrs Raj's money was spent on buying the 13 handkerchiefs.

b) 5 units \rightarrow 13 handkerchiefs.

15 units \rightarrow $\frac{15}{5} \times 13$ handkerchiefs

5

= 39 handkerchiefs

$39 \div 6 = 6\text{r}3$

$6 \times 6 = 36$

$36 + 6 = 42$

$42 + 3 = 45$

She would have gotten 45 handkerchiefs altogether if she had spent all her money on handkerchiefs.
